(clock) drift rate.....	12	blocked process (or thread) .....	7
(time) resolution .....	27	braces.....	7
/dev .....	117	brackets.....	7
/dev/console .....	117	BRE (ERE) matching a single character .....	102
/dev/null.....	117	BRE (ERE) matching multiple characters.....	102
/dev/tty .....	117	break value.....	8
/tmp .....	117	built-in utility.....	8
/ .....	117	byte .....	8
[n, m] and [n, m) .....	36	can .....	1
±0.....	36	canonical mode input processing .....	121
absolute pathname .....	5	carriage-return character.....	8
access mode .....	5	character .....	8
additional file access control mechanism.....	5	character array.....	8
address space.....	5	character class.....	8
affirmative response.....	5	character encoding .....	44
alert.....	5	character set .....	8
alert character .....	5	character special file.....	8
alias name.....	5	character string.....	9
alternate file access control mechanism.....	5	charmap	
alternate signal stack.....	5	description .....	45
angle brackets.....	5	child process .....	9
appropriate privileges .....	6	circumflex.....	9
argument .....	6	clock.....	9
arm (a timer) .....	6	clock tick .....	9
assignment .....	6	coded character set .....	9
asterisk .....	6	codeset .....	9
async-cancel safe function .....	6	collating element.....	9
async-signal safe function.....	6	collation .....	9
asynchronous I/O completion .....	6	collation sequence .....	9
asynchronous I/O operation.....	6	column position .....	10
asynchronously generated signal.....	6	COLUMNS.....	98
awk.....	26, 30, 39, 136	command.....	10
background job.....	6	command language interpreter.....	10
background process .....	6	composite graphic symbol.....	10
background process group .....	6	condition variable.....	10
backquote .....	7	control character .....	10
backslash .....	7	control operator .....	10
backspace character .....	7	controlling process .....	10
base character .....	7	controlling terminal .....	11, 119
basename.....	7	conversion descriptor .....	11
basic regular expression.....	7, 104	core file.....	11
bc.....	30, 136	current working directory .....	11
blank character .....	7	cursor position .....	11
blank line .....	7	data segment.....	11
block special file.....	7	date .....	73, 77-78
block-mode terminal.....	7	DATMSK .....	98

dd .....	134	file group class.....	15
device .....	11	file hierarchy .....	15
output .....	118	file mode .....	15
device ID.....	11	file mode bits .....	15
direct I/O .....	11	file offset .....	15
directory .....	11	file other class .....	15
directory entry.....	11	file owner class.....	15
directory stream.....	11	file permission bits .....	16
disarm (a timer).....	11	file serial number .....	16
display.....	11	file system.....	16
dollar sign.....	12	file times update .....	16
dot.....	12	file type .....	16
dot-dot .....	12	filename .....	15
double-quote.....	12	filter.....	16
downshifting .....	12	FIPS.....	3
driver.....	12	first open (of a file) .....	16
ed.....	30	foreground job.....	16
effective group ID .....	12	foreground process .....	16
effective user ID .....	12	foreground process group .....	16
eight-bit transparency.....	12	foreground process group ID.....	16
empty directory.....	12	form-feed character .....	16
empty line.....	12	grammar	
empty string.....	13	locale .....	82
empty wide-character string.....	13	regular expression.....	112
encoding		graphic character .....	17
